

Midsegment of a Triangle

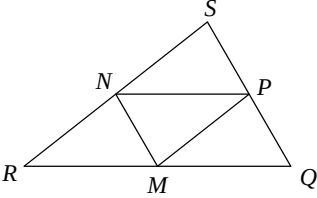

In each triangle, M, N, and P are the midpoints of the sides. Name a segment parallel to the one given.

1)

$\overline{CD} \parallel \underline{\hspace{1cm}}$

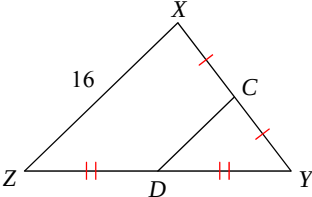

2)

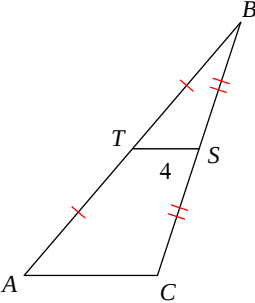

$\underline{\hspace{1cm}} \parallel \overline{QS}$

Find the missing length indicated.

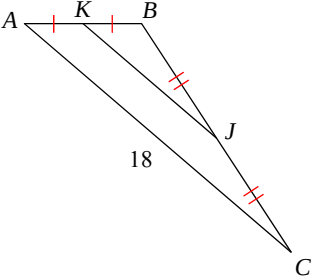

3) Find CD

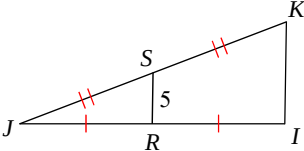

4) Find AC

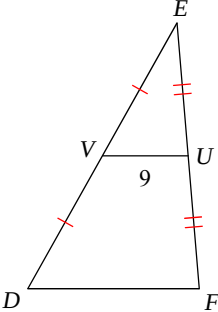

5) Find KJ

6) Find IK

7) Find DF

8) Find PQ
