

Note to Teachers and Parents

This activity book is designed to appeal to students in grades 6-8. It is hoped that the activities presented herein will serve not only to convey information about the International Space Station, but about the challenges and rewards inherent in exploring space - both for the benefit of life on Earth, as well as for humankind's eventual expansion to the Moon, Mars, and the wonders which await us beyond. Through completion of fun activities, we hope to excite your students' imaginations, and engender in them an interest in math and science, culminating in their pursuit of space-related careers and/or hobbies. You are heartily invited to join your students as they work their way through the activities in this book - who knows, some of what they learn might just turn out to be new to you as well! Good luck, and have fun!
