

Where is the International Space Station?

Look up in the sky at special times and you will see the Space Station, brighter than the planet Venus, moving quickly overhead as it goes around the Earth. When it's right above you, the Space Station is almost as far away from you as Dallas is from Houston – or Washington, DC is from New York City (about 250 miles), only straight up!

You can find out when the Space Station will be flying over you at: Spot the Station (<http://spotthestation.nasa.gov>).

Bonus activity: Find a town or city that is about 250 miles from where you live... Now imagine flying that high up...!
