

Packing for a Stay Aboard the Space Station!

Astronaut Yuko is deciding what to take into space. Weight is very important in space travel. Food, water, personal items, and other supplies are needed for the long trip, and their weight all counts against the total weight that the transport spacecraft is able to take up to the Space Station. Yuko can only take up to ten pounds (lb) of personal items with her. Her case weighs two pounds empty, and cannot weigh more than 10 pounds when filled. Help Yuko choose what to take along. Circle the case, and each object you think she should pack in it. Remember to add up the weight as you go, so Yuko doesn't try to pack too much! Multiple solutions are possible!

Teddy Bear
1 lb

Cowboy Boots
4 lb

Photo Album
3 lb

**Electronic
Tablet
1 lb**

**Wireless
Headphones
1 lb**

**Giant
Chocolate Bar
1 lb**

**Case
2 lb**

Grooming Kit
2 lb

[illegible]

Now think of what items not already shown here that you would like to take with you if you were given the chance to live and work on the Space Station. How heavy are they? Would you be able to take them with you? What might you have to leave behind?
