

Design the Next Rocket to Take Astronauts to the International Space Station!

Mix and match the pieces below to design your rocket. Cut out your pieces and paste them together in the picture-box at the right, or simply draw them there. Then, when you've finished building it, name and color your design!

Rocket Engines

(How many of each type will you need?)

Liquid fuel

(Be sure to pick a wide rocket body to hold all the fuel you'll need!)

Solid fuel

(You can pick a narrow rocket body to hold the fuel if you want to!)

Rocket Body

Cargo Compartment

(This is where all the supplies go!)

Crew Compartment

(This is where the astronauts sit!)

Capsule

(You'll need parachutes!)

Flying Body

(You'll need wings and wheels!)

Wings

Fins

Wheels or Parachutes

(These aren't seen at launch, but your rocket will need one or the other to land safely!)

← Check-mark if you're using a capsule

— Check-mark if you're using wings

America's next rocket:

Not sure how this works? See examples on pages 29 and 30!
