

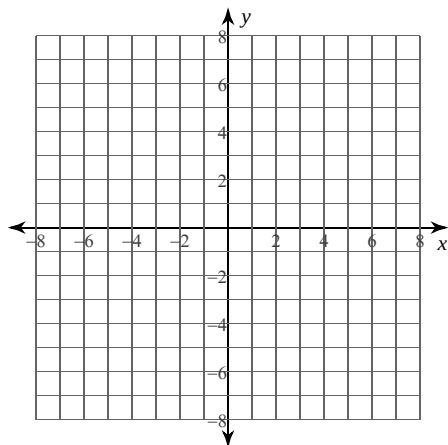

Graphing Logarithms

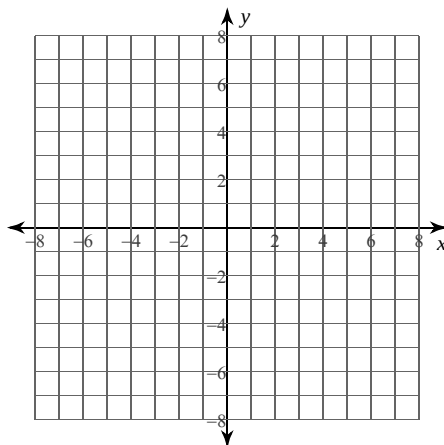

Date_____ Period____

Sketch the graph of each function.

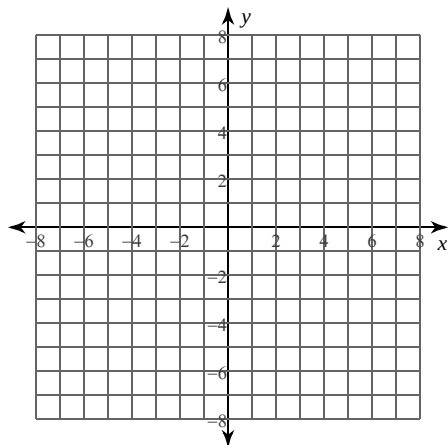

1) $y = \log(x + 5)$

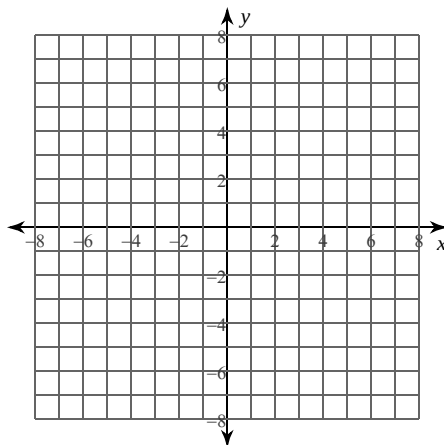

2) $y = \log(x - 2) - 4$

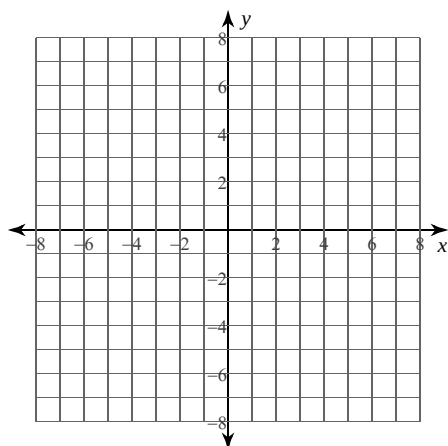

3) $y = \log(x + 4) - 5$

4) $y = \log(x + 1) - 1$

**Identify the domain and range of each. Then sketch the graph.**

5) $y = \log_3(x - 1) - 3$

6) $y = \log_{\frac{1}{3}}(x + 4)$
